Introduction

Designed in collaboration with iconic architects, artists, and designers, glassCAST assembles a collection of architectural bricks and blocks featuring various finish and color options. glassBRICKS and glassBLOCKS provide elegant differentiation of space while allowing in natural light and providing privacy along with a sense of nostalgia and warmth. CARVART is proud to join forces with Nouvel, a pioneer in the design and production of cast and blown glass, to introduce these works of art.

Features + Benefits

Incomparable Form and Function

Indulge in the distinctive design of glassBRICKS and glassBLOCKS—unparalleled in each singular piece and the holistic formation. Harness the natural transparency of glassCAST to manage the privacy and warmth in your space, reflecting light and creating stunning structures of artistry.

Uncomplicated Installation

All glassCAST styles may utilize the ease of standard brick and mortar installation while NVL Block's interlocking features allow for free-standing designs without the need for mortar, armature, or fasteners of any kind.

Limitless Design Possibilities

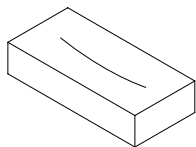

Choose your level of customization (or personalization). Employ the iconic pre-designed pieces or invent your own Bespoke shape, adjusting the color and finish to your desires. Then utilize your conception as the building blocks to create your own work of art. Combine with CARVART's minimalist systems, LED lighting, and other hardware to showcase the natural elegance of the pieces.

glassCAST > Bricks

Designed and produced by Nouvel's team of master artisans in Mexico City, glass interpretations of classic bricks create high impact walls and partitions, favoring the passage of light between space. The solid, pure-glass blocks offer design possibilities limited only by an architect or designer's imagination and vision.

glassCAST

> Blocks > NVL

NVL Block is a modular interlocking glass brick that can be used for architectural or decorative intentions. The innovative interlock creates smooth curves that seamlessly allow freestanding and completely self-supporting construction without the need for mortar, armature, or fasteners of any kind. The result is a celebration of uninterrupted form and light on a monumental scale.

glassCAST

> Blocks > PRV

PRV Block, designed by iconic modernist Mexican architect Pedro Ramírez Vázquez, translates the creator's definitive sensibility in the block's geometric triangular pattern—an amalgamation of pre-Columbian motifs with modern aesthetics—into the beauty and strength of glass.

> Blocks > EG

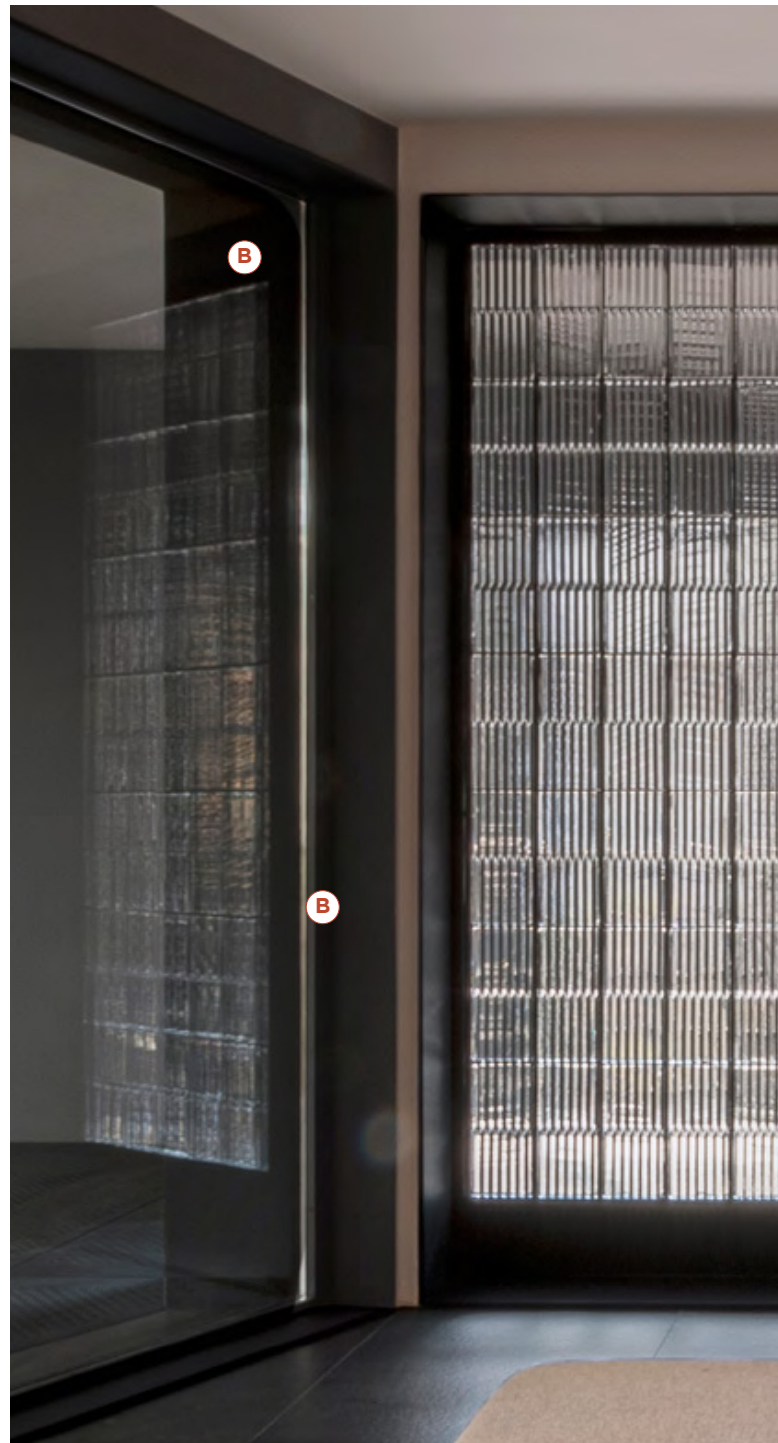

EG Block, by Mexican designer Emiliano Godoy, is inspired by an oceanic phenomenon. This shock wave generates a beautiful refraction in the glass and in the environment. The sharp geometric shapes create an organic movement in the viewer's eye, while angular elements distort the concept of depth and height.
